

START SAVING WITH A SMART THERMOSTAT

A smart thermostat is a Wi-Fi enabled device that “learns” your habits to help you manage home heating and cooling costs. It adjusts your HVAC equipment based on your home’s unique energy profile and the weather outside, so you can save energy and money without sacrificing comfort. A smart thermostat can save up to \$120 annually and typically pays for itself in two years.

For a limited time, Independence Light & Power, Telecommunications residential customers can purchase a new, ENERGY STAR® qualified smart thermostat and earn a rebate from the utility. Customers will receive 50% of the cost of the ENERGY STAR® qualified smart thermostat with a maximum rebate of \$50. To receive your incentive please complete and return the form below with proof of purchase and the model number.

RECEIVE UP TO A \$50 REBATE

SMART THERMOSTAT REBATE

To request your rebate, please complete the form below. Return the form along with a copy of your receipt to the utility office.
